

Rulmeca Motorized Pulleys: a new name with deep roots

The Rulmeca Motorized Pulleys presented in this catalogue have a long history to tell. It goes back to the 1950's, when the product was developed in Germany and Denmark.

Eventually, through a merging process the German Förder und Antriebstechnik Aschersleben GmbH and the Danish John Kirkegaard Maskinfabrik A/S became partners in the Interroll Group.

From the early 1990's the manufacturing of all Interroll's BULK Motorized Pulleys were centralized in Aschersleben, Germany.

In July 2003 Rulli Rulmeca S.p.A. purchased the production facility in Aschersleben, Germany, where Motorized Pulleys have been developed and produced for almost half a century, along with the entire BULK Business Unit.

Today this plant, renamed Rulmeca FAA GmbH, will continue the JOKI tradition for quality and reliability under the Rulmeca brand.

Thanks to this long history Rulmeca is a very experienced manufacturer of BULK Motorized Pulleys, offering the world's largest product range.
